FACIAL AESTHETICS

As we get older, our skin starts to show signs of ageing. It's an inevitable part of life and can be quite the knock in confidence when you start to notice lines around your eyes and mouth. These wrinkles are a side-effect of your skin losing collagen and elastin, components in the chemical make-up of your skin responsible for its volume and elasticity.

Our qualified clinicians have a range of facial aesthetic treatments that can help combat these wrinkles. Whether you wish to smooth away noticeable lines that appear when you laugh, frown or smile, or those pesky lines that are always on view, we have treatments that will help.

Why visit your dental practice for facial aesthetics?

Many people would assume that these types of treatments belong in a beautician's studio and not a dental practice. Our clinicians are experts in the facial anatomy, not just teeth and gums. We have high standards of care and have carried out extensive training in the field to make sure that any clinicians offering services are fully qualified to do so.

Facial aesthetic consultations

Everyone has a different skin type so we offer facial aesthetic consultations where we can talk through which treatments would deliver the best results for your skin. These consultations are ideal opportunities for us to come up with a treatment plan that will work best. To arrange a consultation, simply get in touch.

WHAT TREATMENTS ARE AVAILABLE?

Dermal Fillers

Using dermal fillers, we can replenish lost volume and smoothen noticeable lines. Fillers work through stimulating cellular reproduction and giving skin a new lease of life.

Anti-wrinkle injections

Our qualified facial aesthetics clinician can prescribe anti-wrinkle injections. Known by the brand name, Botox, this treatment can target muscles under the skin and block nerve signals.

This stops wrinkles that appear through muscle movement in the face.

The effects of your treatment fade over time and need to be topped up.

The treatments do last longer over time as you have it done more often.
